

Innov8now.

INNOV8NOW LLC | CAPABILITY STATEMENT

Auditable AI for complex decisions.

AI decision support, rules checking, private knowledge systems, and the software engineering that connects them to real workflows.

Government, defense and regulated commercial teams

CORE CAPABILITIES

AI decision support

Structure alternatives, criteria, assumptions and evidence. Design repeatable evaluations and explicit human review.

Rules and standards checking

Compare documents with controlled rulebooks, cite relevant passages, and surface conflicts or missing evidence for a reviewer.

Private knowledge systems

Design retrieval, permissions and source maintenance for cloud, on-premises or disconnected environments around the engagement's requirements.

Software and systems integration

Connect AI workflows to enterprise applications, APIs and data using hands-on Azure, .NET/C# and Python engineering.

Rugged edge and RFID

Connect field data capture, rugged devices and RFID events with operational records and enterprise workflows.

COMPANY INFORMATION

Legal name: INNOV8NOW LLC

Business: Small business; founded 2012

Location: Hammonton, New Jersey

UEI: HU48FLK39UE1

NAICS

541511 - Custom Computer Programming Services

541512 - Computer Systems Design Services

ENGINEERING APPROACH

- Principal-led architecture and hands-on implementation.
- Source evidence, uncertainty and reviewer ownership designed into the workflow.
- Focused evaluation before expanding the build or automating actions.
- Deployment and operating boundaries agreed for each engagement.

PRINCIPAL EXPERIENCE

Shawn Iuliucci brings more than 20 years of software architecture and engineering experience across rail, defense, enterprise software, cloud infrastructure and field technology.
